Education

Vellore Institute of Technology, Amaravathi, India

B.Tech in Computer Science, Artificial Intelligence & Machine Learning

Sri Chaitanya College, Guntur, India

Intermediate Education

Dec 2021 – Jul 2025

GPA: 8.99/10

Jun 2019 – Aug 2021

Grade : 973/1000

Work Experience

Infosys Limited, Digital Specialist Engineer

Dec 2025 – Present

- Completed enterprise-level training in **Big Data Engineering**, Cloud Computing, Data Engineering, and Artificial Intelligence as part of the Digital Specialist Engineer program.
- Developed expertise in **Python, SQL**, Database Management Systems, **Linux, Shell Scripting, MongoDB, and Neo4j** for data processing, querying, and large-scale analytics.
- Built and optimized data processing workflows using **Hadoop, Apache Spark, PySpark, and PySpark Streaming** for large-scale batch and real-time analytics pipelines.
- Implemented distributed data ingestion and streaming solutions using **Apache Kafka**, gaining hands-on exposure to event-driven architectures and real-time data pipelines.
- Designed cloud-based **ETL workflows** using **Microsoft Azure, Azure Data Factory (ADF), and Azure Databricks** for scalable data engineering solutions.

Projects

Real-Time Log Analytics Pipeline

Jan 2026 – Apr 2026

- Designed and implemented a **real-time log analytics** pipeline to process server log data at scale using **Apache Kafka and PySpark Streaming**.
- Developed streaming jobs to ingest, transform, and aggregate log events, enabling monitoring of user activity, error rates, and system performance metrics.
- Utilized **Apache Spark and PySpark** for **distributed data processing**, improving scalability and reducing processing latency for large datasets.
- Stored processed output in **MongoDB** and generated analytical reports with **Python, Pandas, and Matplotlib** for trend analysis and visualization.

Predictive Modeling for Epidemic Outbreaks

Aug 2024 – Dec 2024

- Engineered **Bidirectional LSTM, Transformer, and GRU** deep learning models to forecast COVID-19 cases using a Kaggle dataset of 184,000+ entries.
- Preprocessed large-scale time series data using normalization, rolling averages, and feature engineering, improving model accuracy by reducing data noise.
- Evaluated models using **RMSE, MAE, and R-squared** metrics; achieved best performance with Bidirectional LSTM, with results visualized interactively using Matplotlib.

Skills

Programming Languages: Python, Java, JavaScript, SQL, C#(Basic)

Big Data Technologies: Hadoop, Apache Spark, PySpark, Spark Streaming, Apache Kafka

Cloud Technologies: Microsoft Azure, Azure Data Factory (ADF), Azure Databricks

Databases: MySQL, MongoDB, Neo4j, SQLite, JDBC, Supabase

Data Science & Machine Learning: NumPy, Pandas, Matplotlib, TensorFlow, Scikit-learn

Web Technologies & Frameworks: HTML, CSS, ReactJS, NodeJS, ExpressJS, Flask, FastAPI

Operating Systems & Scripting: Linux, Shell Scripting

Tools: Git, Maven, Docker, Postman, VS Code, Kaggle, IntelliJ, Eclipse

Certifications & Achievements

- **Infosys Big Data Specialist Engineer Training** passed with 76
- Earned Google Developers SmartBridge **AI-ML Certification**, showcasing skills in AI/ML and achieving a 90% accuracy rate in the developed predictive models during the internship – [Link](#).
- Secured NERD (DSA using Java) certification from VIT-AP – [Link](#).
- Solved 300+ problems on LeetCode and GeeksforGeeks, demonstrating strong coding and algorithmic skills.
