PROFESSIONAL SUMMARY

Software Engineer at **Infosys Limited** with hands-on experience in **Python and Java** application development, **big-data pipelines (Apache Spark, Kafka)**, and **cloud data engineering on Microsoft Azure**. **Claude Certified Architect** and Databricks-certified in **Generative AI Engineering and Data Engineering**, with additional experience in **ReactJS, Flask, and FastAPI** web development and **Transformer-based deep learning**. Comfortable working independently or within distributed, cross-functional teams to debug and ship production-grade data and AI systems.

CERTIFICATIONS

- **Claude Certified Architect - Foundations** — Anthropic (agentic architecture, Claude API, Model Context Protocol)
- **Databricks Certified Generative AI Engineer Associate** — LLM-enabled solutions, RAG, vector search
- **Databricks Certified Data Engineer Professional** — production-grade data pipelines, Delta Lake, Spark
- **Google Developers SmartBridge AI-ML Certification** — AI/ML internship, 90% model accuracy achieved
- **Infosys Big Data Specialist Engineer Training** — Certified (76%)

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL, C# (Basic)

Generative AI & Data Platforms: RAG, LLM-enabled solutions, Claude API, MCP, Databricks, TensorFlow, Scikit-learn

Web & Application Development: ReactJS, NodeJS, ExpressJS, Flask, FastAPI, HTML, CSS, RESTful APIs

Big Data & Cloud: Apache Spark, PySpark, Spark Streaming, Apache Kafka, Hadoop, Microsoft Azure, Azure Data Factory, Azure Databricks

Databases: MySQL, MongoDB, Neo4j, SQLite, Supabase, JDBC

Tools & Platforms: Git, Docker, Postman, Maven, Linux, Shell Scripting, VS Code, IntelliJ, Eclipse

WORK EXPERIENCE

Infosys Limited — Digital Specialist Engineer

Dec 2025 – Present

- Completed a **3-month** enterprise-level training in **Big Data Engineering, Cloud Computing, and Artificial Intelligence** as part of the Digital Specialist Engineer program.
- Applied **Python, SQL, and Linux/Shell scripting** across **2 database systems** (MongoDB and Neo4j) for data processing and large-scale analytics.
- Engineered and optimized batch and streaming data pipelines using **4 big-data technologies** — Hadoop, Apache Spark, PySpark, and PySpark Streaming.
- Implemented distributed data ingestion with **Apache Kafka**, gaining hands-on exposure to event-driven architectures.
- Designed cloud-based ETL workflows across **2 Azure services** — Azure Data Factory and Azure Databricks.

PROJECTS

Real-Time Log Analytics Pipeline

Jan 2026 – Apr 2026

- Designed a **4-stage** real-time analytics pipeline (ingest → transform → aggregate → store) with **Apache Kafka and PySpark Streaming**.
- Developed streaming jobs tracking **3 key metrics** — **user activity, error rates, and system performance**.
- Integrated **Apache Spark** for distributed processing across the **4-stage** pipeline, improving scalability on large datasets.
- Stored processed output in MongoDB and generated analytical reports using **3 tools** — Python, Pandas, and Matplotlib.

Predictive Modeling for Epidemic Outbreaks

Aug 2024 – Dec 2024

- Trained **Bidirectional LSTM, GRU, and Transformer** deep learning models to forecast COVID-19 case trends on a **184,000+ record** Kaggle dataset.
- Applied **Transformer architecture** — the core building block behind modern Generative AI models — to sequential time-series forecasting.
- Preprocessed time-series data using **3 techniques** — normalization, rolling averages, and feature engineering — improving model accuracy and reducing noise.
- Achieved **92% accuracy** with the best-performing model, **Bidirectional LSTM** (evaluated via RMSE, MAE, and R²), visualized using Matplotlib.

EDUCATION

Vellore Institute of Technology, Amaravathi, India — B.Tech, Computer Science (AI & ML)

Dec 2021 – Jul 2025

GPA: 8.99 / 10

Sri Chaitanya College, Guntur, India — Intermediate Education

Jun 2019 – Aug 2021

Score: 973 / 1000
